

## My tape/CD collection

Note, all shows are transferred from tape masters, unless the release is specifically noted. In that case the recording I have comes from that. (and the Status field says CD #)

Unless again I have noted that the tape copy I had is better than the CD release.

I have finished transferring all my tapes to CD. These CDs all have separate tracks, even for the smallest excerpts! I produced a detailed tracklisting so that I can even find the 2 second excerpts in no time!

Also some of the shows are completely remastered and have been worked on to digitally improve the sound of the recording. I will soon put up a sample of the old 26 Jan 1973 OS tape and the end result. You will notice a big difference. The shows that are improved the same way like this one will be marked with the tag: **IMPROVED**.

Improving sound is not always possible due to the type of defect a tape has. But some shows are quite good improvable. I also hope to be able to improve video quality like this. Already audio that goes along with the video will be improved.

Also I **garantee** that every show in my collection is unique.

Therefore every person who finds a duplicate show within my collection (e.g. that is the same as another show listed in my collection) will get a replacement of the first show and one bonus for finding the duplicate!

Problems with a disc, faulty disc? Please email me with the description. After confirmation I will send you a replacement (free of charge) and after that please return the faulty disc for problem analysis.
